Unitaid plays a role at 3 critical moments

Content

- 1. Overview - Unitaid strategy 2017-2021**
- 2. Malaria portfolio and investments in IPTp**

List of endorsed Areas for Interventions in malaria

1. Accelerate adoption of innovative vector control tools
2. Optimize introduction of tools for the treatment of severe malaria
- 3. Expand access to preventive chemotherapy in pregnant women**
4. Opportunity for a malaria vaccine

November 2015: Call for Proposals

Support adequate supply of quality SP, including adapted packaging

Work with SP manufacturers to meet international quality standards/achieve WHO PQ; expand production capacity; adapt packaging for SP's use in IPTp

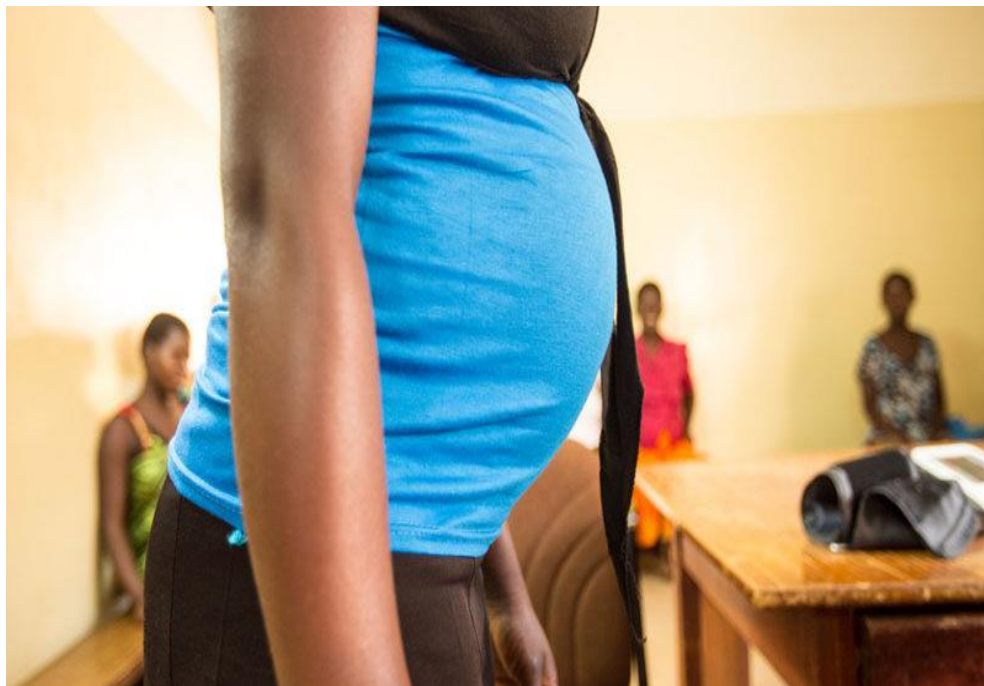

Generate evidence for innovative approaches to delivery and demand generation, to support global guidance & scale-up

Develop and test innovative models of IPTp delivery, such as new delivery channels and approaches, private sector engagement, demand generation, and logistics and stock management

TIPTOP: Transforming IPT for Optimal Pregnancy

**Lead
Grantee**

Jhpiego

**Grant
Period**

2017 - 2021

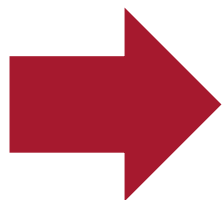

**Grant
Value**

US\$ 50

**Target
Coverage**

400,000 pregnant women, 4
African countries

**Grant
Impact**

*Catalyse uptake of IPTp and improve referral to
antenatal care*

IPTp enabling activities – supply side

Improve global supply of quality assured SP for IPTp:

1. Secure WHO PQ or SRA pathways for QA SP
2. Develop adapted drug packaging promoting IPTp-SP
3. Strengthen of SP product demand forecast
4. Conduct landscape analysis to identify a viable sulfadoxine API manufacturer to expand market supply for QA SP
5. Support regulatory approval of a 2nd manufacturer for sulfadoxine API

WHO: IPTp enabling activities

1. **Technical support** to pilot interventions, and documentation of best practices
2. Convene WHO-ERG and review evidence to develop WHO **policy recommendations**
3. Provide **implementation guidance** and technical assistance to national health authorities and partners in focus countries
4. **Disseminate** policy recommendations, knowledge and lesson learned

Summary: Unitaid's malaria portfolio
