

Vector Control in Humanitarian Emergencies

Mission Statement

To reduce human suffering and death from vector-borne diseases in Humanitarian Emergencies by:

- a) improving delivery, uptake, integration and evaluation of existing vector surveillance and control tools;*
- b) facilitating the development of an evidence-base and uptake of supplementary and emerging tools.*

UNICEF, MSF/B, MENTOR, WHO, UNHCR, RBM

Consider three phases

Consider all vectors and pests

Consider tools for Emergencies and “outdoor transmission” more generally
